

# SIT323 Practical Software Development, Trimester 2, 2015

## Assignment 1 - Submission Instructions

### What not to submit

Do not submit any exe files because sometimes these are considered as viruses by antivirus software. On occasions downloading student ZIP files from CloudDeakin fails because they contained exe files.

Prior to submission, you can delete the 'bin' and 'obj' folders containing exe files (see Figure 1). Any exe files required by the marker can be reproduced during a Visual Studio build.

### Submission

Please submit one ZIP file of your Visual Studio solution and Log Files. Hopefully you already have everything in one folder (see Figure 2); if not, please arrange something similar.

Figure 2 shows that everything is in the "SIT323 Assignment 1 Solution" folder. The folder "CrozzleApplication" and file "SIT323 Assignment.sln" are the Visual Studio ones. Your log files can be created in the "Log Files" folder.

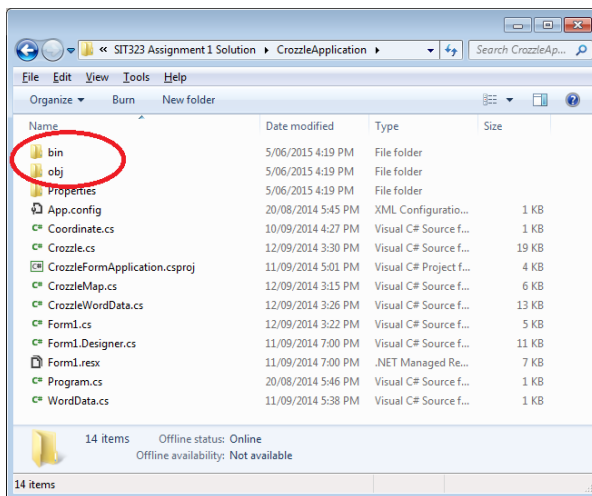

Figure 1.

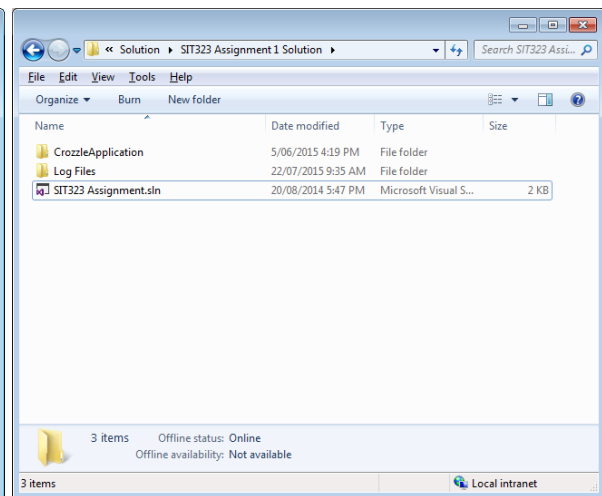

Figure 2.

Once you have everything in one folder you can simply ZIP that folder and:

1. Test your ZIP file before submission. That is, after unzipping to a new folder, ensure that everything compiles and runs as it should; try this on another machine and hard-drive.
2. Upload your ZIP file to the appropriate CloudDeakin dropbox during submission.
